

VoIP.ms Certifies Interoperability with Snom SIP Phones

VoIP.ms announces certification of Snom D7XX Series SIP Phones

BEAVERTON, OR / MONTREAL, CANADA (August 29, 2019) VoIP.ms, a leading Bring-Your-Own-Device VoIP provider, and Snom Americas, a leading manufacturer of professional and enterprise IP phones, have certified interoperability of the [Snom D7XX SIP desk phones](#) with their services.

The two companies have joined forces to provide enterprise customers and channel partners with reliable, cost-effective, and flexible communication systems. This new integration means rapid, easily managed deployments with the latest Snom Americas SIP desk phone offering.

Comprehensive tests involved the interoperability of VoIP.ms PBX platforms. The platforms added the following new D7XX Series models to VoIP.ms's PBX solutions, resulting in successful interoperability and ease of configuration:

Snom SIP Desk Phone Series:

- D785 SIP Color Desk Phone
- D735 SIP Color Desk Phone
- D717 SIP Color Desk Phone
- D120 SIP Desk Phone

"Our partnership means customers around the world, particularly in Canada and the United States, can now bring their new Snom phones to the VoIP.ms service," said Shawn Shulman, vice president of sales, Snom Americas, Canada. "VoIP.ms's leading edge IP-PBX software and the Snom product portfolio is the perfect combination to enable scalable, reliable and feature rich telecommunications support for channel partners who want to grow their business."

"We are very pleased to form a strategic partnership with Snom as a pioneer and leader in the IP phones industry," said David Rouleau, Vice President of Corporate Development, VoIP.ms. "This partnership will undoubtedly yield great benefits for our shared customers all across the world."

Cost-effective and easy to use, the Snom D7XX SIP desk phones seamlessly scale from small to enterprise businesses. Snom Americas backs the D7XX Series with North American based sales, technical and support teams, as well as industry-leading three-year warranties. These robust phones include customizable color LCD screens and dedicated feature keys to enable convenient call handling.

The Snom D785 SIP Color desk phone helps people manage and delegate calls on a daily basis. Employees can easily handle multiple calls via a 4.3-inch color LCD screen, 10 clear lines of information and four soft keys. The D785 can also simultaneously support up to 12 SIP lines or accounts from a single setup. A second LCD screen gives users access to four pages of six self-labeling feature keys for instant access to programmable functions, eliminating the requirement for an additional side car deployment.
